SUMMARY

B.E. Computer Science & Engineering student specializing in Data Science at MVJ College of Engineering. Interested in data analysis, AI/ML, and backend development — building from data pipelines and APIs to intelligent applications.

EXPERIENCE

Backend Developer Intern

2025 — Present

Nija Venture Impacts Pvt. Ltd.

- Built 10+ REST API endpoints with Node.js and Express for auth and core product flows.
- Designed MongoDB collections with CRUD, JWT authentication, and role-based access.
- Improved reliability with middleware architecture and structured error handling.
- Collaborated with frontend engineers to integrate and debug scalable services.

EDUCATION

B.E. Computer Science & Engineering — Data Science

2026

MVJ College of Engineering

SELECTED PROJECTS

- **Lexicon Gate** — Evidence-grounded Self-RAG research workspace with hybrid retrieval, claim verification, and cited answers.
- **Sign Language Recognition** — Real-time recognition with MediaPipe landmarks, CNN-LSTM / MobileNet-LSTM models, and live webcam inference.
- **KYC / AML Orchestration** — Fintech orchestration with JWT auth, vendor adapters, state-machine workflows, and Dockerized REST APIs.
- **ZestRoute** — Delivery analytics on AWS S3, Snowflake, SQL, and Power BI.

SKILLS

Languages: C++, Python, JavaScript, SQL, Java, R

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, Socket.io

Data & ML: MongoDB, MySQL, PyTorch, XGBoost, LangChain, Power BI, Snowflake

Tools: Docker, Git, Linux, AWS
