SUMMARY

B.E. Computer Science & Engineering student specializing in Data Science at MVJ College of Engineering. Interested in data analysis, AI/ML, and backend development — building from data pipelines and APIs to intelligent applications.

EXPERIENCE

Backend Developer Intern

2025 — Present

Nija Venture Impacts Pvt. Ltd.

- Built 10+ REST API endpoints with Node.js and Express for auth and core product flows.
- Designed MongoDB collections with CRUD, JWT authentication, and role-based access.
- Improved reliability with middleware architecture and structured error handling.
- Collaborated with frontend engineers to integrate and debug scalable services.

EDUCATION

B.E. Computer Science & Engineering — Data Science

2026

MVJ College of Engineering

SELECTED PROJECTS

- **KYC / AML Orchestration** — Distributed fintech compliance platform with microservices, async messaging, and secure authentication.
- **ZestRoute** — Delivery analytics on AWS S3, Snowflake, SQL, and Power BI.
- **AegisQA** — Autonomous QA agent for exploring flows and flagging regressions.
- **Bus Reservation** — Streamlit + Python + MySQL booking system with auth.

SKILLS

Languages: C++, Python, JavaScript, SQL, Java, R

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, Socket.io

Data & ML: MongoDB, MySQL, PyTorch, XGBoost, LangChain, Power BI, Snowflake

Tools: Docker, Git, Linux, AWS
